

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please enter the following Abstract of the Disclosure in the record:

A device for smoothing out clothes, in particular shirts comprising an external inflatable body and an internal inflatable body each of which is provided with a trunk section. When inflated, the external and internal inflatable bodies are adjacent to each other through a contact area, and the material of the internal inflatable body and/or external inflatable body exhibits at least a mean air permeability at least in a transmission area which forms the part of the contact area.
